

RESEARCH ASSISTANT

Job Title:	Research Assistant
Department:	Clinical Research
Faculty:	Infectious and Tropical Diseases
Location:	Keppel Street, London
FTE:	1.0
Grade:	G5
Accountable to:	Line manager: Dr Sarah Polack Accountable to: Ms Dorothy Boggs
Job Summary:	<p>We are seeking to appoint a Research Assistant to work, with the International Centre for Evidence on Disability, on a project to assess Assistive Technology (AT) needs in low and middle income countries. This project is part of a multi-partner initiative called AT2030, funded by DFID and led by the Global Disability Innovation Hub. The AT2030 programme focuses on Life Changing Assistive Technology (such as wheelchairs, prosthetics, hearing aids, glasses and digital assistance) for all. Its aim is to reach over 3 million people (in particular, people with disabilities), testing new approaches and backing 'what works' to get assistive technology (AT) to those who need it. Within AT2030, this specific project is developing survey methodology to assess the population level AT needs related to functional domains of vision, hearing, mobility, cognition, communication and self-care.</p> <p>The post-holder will assist with methodology development and conducting population-based AT need surveys in 1-2 countries. This will include contributing to the development of quantitative data collection tools, supporting the organization and management of surveys and assisting with data management, analysis and reporting writing.</p>

GENERAL INFORMATION

The London School of Hygiene & Tropical Medicine

The London School of Hygiene & Tropical Medicine is a world-leading centre for research and postgraduate education in public and global health. Our mission is to improve health and health equity in the UK and worldwide; working in partnership to achieve excellence in public and global health research, education and translation of knowledge into policy and practice.

Founded in 1899, the School has expanded in recent years at its two main sites on Keppel Street and Tavistock Place. Our staff, students and alumni work in more than 150 countries in government, academia, international agencies and health services.

Research income has grown to more than £180 million per year from national and international funding sources including UK government and research councils, the European Union, the Wellcome Trust, Gates Foundation and other philanthropic sources.

Our diverse research talents, skills and experience, underpin our position as a leader in public and global health. These range from the molecular to the global, the theoretical to the applied, the analytical to the political. Our staff are conducting research in more than 100 countries.

We have 3,300 staff based all around the world with core hubs in London and at the MRC Units in The Gambia and Uganda, which joined LSHTM in February 2018. Our outstanding, diverse and committed staff make an impact where it is most needed - deploying research in real time in response to crises, developing innovative programmes for major health threats, or training the

next generations of public and global health leaders and researchers.

Working in partnership is central to achieving our mission. Our strategic collaborations in the UK and across high-, middle- and low-income countries deliver health and socioeconomic benefits across the world, especially in the most disadvantaged communities.

LSHTM is also a member of the M8 Alliance of Academic Health Centers, Universities and National Academies, the Association of Schools of Public Health in the European Region, and the Consortium of Universities for Global Health.

We deliver research-led educational programmes to future health leaders, managers and researchers across the world. We have more than 1,200 face-to-face Master's and Doctoral students, 3,000 studying by distance learning, and 1,000 each year on short courses and continuous professional development. Our free online courses are studied by more than 70,000 participants globally.

LSHTM performs strongly in various global university league tables. In the 2019 CWTS Leiden Ranking LSHTM is ranked the UK's top university for the proportion of academic research with women listed as authors, first in Europe for publishing open access research, and first in Europe and eighth in the world for research impact in sciences (for the proportion of its total publications ranking in the top 10% of most cited research).

In the US News Best Global Universities Ranking 2019, we ranked ninth in the UK overall and 13th in the world in the fields of social sciences and public health. We ranked 27th for medicine in the 2019 QS World University Rankings.

In the 2019 Shanghai World Ranking we placed 201-300 overall, and ranked 4th in public health (1st in the UK), 17th in clinical medicine, and 76-100 in human biological sciences. In 2017, the inaugural Center for World University Rankings by Subject placed LSHTM first in the world for tropical medicine research, second for parasitology and seventh for infectious diseases, public, environment and occupational health, and social sciences and biomedical.

LSHTM was named University of the Year 2016 by Times Higher Education and awarded a Queen's Anniversary Prize for Higher and Further Education in 2017 in recognition of our response to the 2014 Ebola epidemic in West Africa. LSHTM does not appear in the Times Higher Education World University Rankings as universities are excluded if they do not teach undergraduates.

We seek to foster and sustain a creative and supportive working environment based upon an ethos of respect and rigorous scientific enquiry. We embrace and value the diversity of our staff and student population and seek to promote equality as an essential element in contribution to improving health worldwide.

LSHTM is one of around 20 specialist institutions that receive institution specific funding from the Office for Students (OfS). This funding recognises the additional costs that LSHTM incurs because of its unique range of teaching, specialist facilities, and the scale of its contributions to national and international agencies.

FACULTY INFORMATION

Faculty of Infectious and Tropical Diseases

The Faculty of Infectious and Tropical Diseases encompasses all of the laboratory-based research in the School as well as that on the clinical and epidemiological aspects of infectious and tropical diseases. It is headed by Alison Grant, who is **Professor of International Health**. The range of disciplines represented in the faculty is very broad and inter-disciplinary research is a feature of much of our activity. The spectrum of diseases studied is wide and there are major research groups with a focus on malaria, tuberculosis, HIV/AIDS and other sexually transmitted diseases, vaccine development and evaluation, and vector biology and disease control. The Faculty is organised into three large research departments comprising: Clinical Research, Disease Control, and Infection Biology. There is close interaction between scientists in different research teams. The Faculty has strong overseas links, which provide a basis for field studies and international collaborations in developed and developing countries. The teaching programme includes MSc courses, taught in-house and by distance learning, which are modular in structure, a variety of short-courses and an active doctoral programme (PhD and DrPH). For further information on the Faculty see: <http://www.lshtm.ac.uk/itd/index.html>.

Department of Clinical Research (Head: Professor David Mabey)

The Department of Clinical Research addresses infectious diseases of major public health importance in developing countries. Activities include trials of new therapies, vaccines and educational interventions; the development of new diagnostic tests; studies to elucidate the immunological and molecular correlates of pathogenesis and protective immunity, and to identify genetic polymorphisms conferring protection or susceptibility to infectious diseases; health services research which aims to identify the most efficient and cost-effective way to deliver health care; and health policy analysis. In addition to our many overseas collaborations, we have close links with the Hospital for Tropical Diseases, in purpose-built accommodation on the main UCL Hospital campus, five minutes walk from the School. The Wellcome Trust Bloomsbury Centre for Global Health Research is based in the Department, and supports Clinical Fellows at all levels, most of whom are based overseas.

The Department's main research interests include HIV and related infections; in particular, the interaction between HIV infection and tuberculosis, and other sexually transmitted diseases; malaria; trachoma; leprosy; diagnostic tests for resource limited settings; eye health; disability; and travel medicine.

The International Centre for Evidence in Disability was launched in June, 2010. The aim is to establish LSHTM as an international centre with expertise and competence in disability research and teaching in the context of public health and development. The Centre draws together a diverse range of researchers across LSHTM, with broad skills and knowledge in the field of disability. Our focus is on developing tools, techniques and evidence about disability, leading to scalable interventions. We place a strong emphasis on translating research outcomes into practice and are closely linked to several international non-governmental organizations (NGOs) and agencies to help achieve this goal. The majority of our research is undertaken in low- and middle-income countries. We also run a teaching programme on disability within LSHTM.

The portfolio of duties outlined below will vary in accordance with the detailed expectations of the role (attached), which may be varied from time to time, and agreed at your annual Performance and Development Review (PDR).

JOB DESCRIPTION

Main Activities and Responsibilities

KNOWLEDGE GENERATION

1. To undertake high quality research as directed by your line manager, including contributing to drafting grant proposals and peer-reviewed and other outputs;
2. To support the administration of projects linked to your employment, helping ensure compliance with good practice in relation to the conduct of research, the ethics policy, and other relevant School policies;
3. To contribute to the preparation of quantitative data collection tools and protocols related to the assessment of Assistive technology needs in low and middle income countries;
4. To contribute to the submission of ethical approval applications;
5. To contribute to the organization and management of quantitative fieldwork including through field visits;
6. To support with bespoke mobile data collection tool development and data management;
7. To contribute to project reports and peer-reviewed publications.

EDUCATION

1. To participate in some aspects of the School's Education Programme or educational outreach activities;
2. To contribute to seminars, lectures, short courses and other events at the School.

INTERNAL CONTRIBUTION

1. To undertake activities that support the Department, Faculty or the School;
2. To participate in the School's PDR process;
3. Contribute to general activities of the Disability Group, which help to promote the objectives of the group.

EXTERNAL CONTRIBUTION

1. To demonstrate good external citizenship by supporting the external academic and practice communities;
2. To interact with global disability and health community.

PROFESSIONAL DEVELOPMENT & TRAINING

1. To keep up-to-date with the latest research / thinking in your academic field and with changes to pedagogic practice within the School and more generally;
2. For lab-based disciplines: where the length and nature of the position permits, to apply for and, if accepted, undertake a doctoral degree (if not already acquired);
3. To undertake and successfully complete the mandatory training required by the School as appropriate to the role;

RESEARCH ASSISTANT

GENERAL

All academic staff are free within the law to question and test received wisdom, and put forward new ideas and controversial or unpopular opinions, to enable the School to engage in research and promote learning to the highest possible standards.

All staff at LSHTM are also expected to:

1. Act at all times in the School's best interests;
2. Treat School staff, students and visitors with courtesy and respect at all times;
3. Comply fully with School policies, procedures and administrative processes relevant to the role;
4. Uphold and support the School's values (as set out in the School Strategy document);
5. Act as ambassadors for the School when hosting visitors or attending external events;
6. Be responsible for time management and ensuring that milestones are met.

The above list of duties is not exclusive or exhaustive and the role holder will be required to undertake such tasks as may reasonably be expected within the scope and grading of the role.

Role descriptions should be regularly reviewed to ensure they are an accurate representation of the role.

PERSON SPECIFICATION

This form lists the essential and desirable requirements needed by the post holder to be able to perform the job effectively.

Applicants will be shortlisted solely on the extent to which they meet these requirements.

ESSENTIAL CRITERIA:

1. MSc degree in Public/Global Health, Epidemiology or related field, either awarded or imminent or equivalent training.
2. Relevant experience in Public Health, epidemiology, or related field with experience of undertaking quality research in health/disability.
3. Evidence of good organisational skills, including effective time management.
4. Proven ability to work independently, as well as collaboratively as part of a research team.
5. Evidence of excellent interpersonal skills, including the ability to communicate effectively both orally and in writing
6. Relevant computer/analytical skills (Microsoft word, excel, PowerPoint).
7. Experience of writing reports or publications.
8. Experience in developing questionnaires/data collection tools to support quantitative data collection

DESIRABLE CRITERIA

1. Some experience of teaching
2. Knowledge about assistive technology, either as a user or professional.
3. Knowledge about disability and/or rehabilitation.
4. Experience of using software to collect and manage data in resource-constrained environments.
5. Experience of data management and statistical analysis.
6. Experience of working in low- and middle-income countries.

SALARY AND CONDITIONS OF APPOINTMENT

The post is funded until 30 April 2021. The salary will be on the Academic scale, Grade 5 scale £34,238 - £40,011 per annum (inclusive of London Weighting). The post will be subject to the LSHTM terms and conditions of service. Annual leave entitlement is 30 working days per year, pro rata for part time staff. In addition to this there are discretionary "Director's Days". Membership of the Pension Scheme is available.

Applications should be made online via our website at <http://jobs.lshtm.ac.uk>. Applications should also include the names and email contacts of 2 referees who can be contacted immediately if shortlisted. Online applications will be accepted by the automated system until 10pm of the closing date. Any queries regarding the application process may be addressed to jobs@lshtm.ac.uk. Please quote reference ITD-CRD-2020-11

The supporting statement section should set out how your qualifications, experience and training meet each of the selection criteria. Please provide one or more paragraphs addressing each criterion. The supporting statement is an essential part of the selection process and thus a failure to provide this information will mean that the application will not be considered. An answer to any of the criteria such as "Please see attached CV" will not be considered acceptable.

Please note that if you are shortlisted and are unable to attend on the interview date it may not be possible to offer you an alternative date.

ASYLUM AND IMMIGRATION STATEMENT

The School will comply with current UKVI legislation, which requires all employees to provide documentary evidence of their legal right to work in this country prior to commencing employment. Candidates will be required to email a copy of their passport (and visa if applicable) to HR prior to their interview and if appointed will be asked to bring the original documents in to be copied and verified before their start date.

The advertisement of this role does not meet the minimum requirements set by UKVI to enable sponsorship of migrant workers. Therefore, we cannot progress applications from candidates who require sponsorship to work in the UK.

Date amended: February 2020

Academic Expectations: Research Assistant

Examples of expected types of activities are listed; the selection of activities will vary from year to year and not all activities in each category would necessarily be done in any one year. The statement in each shaded heading summarises the general expectations for contributions in each category. Given the nature of employment as a Research Assistant, it is expected that most activity will focus on knowledge generation, but some activity in other areas is desirable and will be required for career progression.

<i>Knowledge generation: High quality support for, and contribution to, research</i>
<i>Research and scholarship</i> <ul style="list-style-type: none">• Undertaking research, as directed by line manager• Contributions to funding applications including supporting more senior staff in completing applications• Contributing to peer-reviewed outputs as expected by the subject area/discipline in terms of types of output• Poster/oral presentations at conferences• Social media contributions such as twitter, blogs, web-based media or webinars <i>Doctoral degree supervision</i> <ul style="list-style-type: none">• None expected though involvement in advisory activities/roles or provision of practical skills training is encouraged where relevant <i>Research management, leadership and support</i> <ul style="list-style-type: none">• Effective management of own time and activities• Supporting the administration of projects he/she is employed on, eg taking meeting minutes <i>Professional development</i> <ul style="list-style-type: none">• Appropriate courses and other development activities, referenced to RDF• Especially for lab-based disciplines: where the length, nature and funding source of the position permit, to apply for and, if accepted, undertake a doctoral degree (if not already acquired).
<i>Education: Participation in educational activities¹</i>
<i>Teaching and assessment</i> <ul style="list-style-type: none">• Limited participation in some aspects of the School's Education Programme or education outreach activities e.g. contributions to taught courses, research methods training, mentoring school pupils on outreach programmes
<i>Educational development and innovation</i> <ul style="list-style-type: none">• Limited contributions to educational innovations or developments, e.g. helping to update the content or delivery of a course or module <i>Educational leadership and management</i> <ul style="list-style-type: none">• None expected <i>Professional development</i> <ul style="list-style-type: none">• Formal study/training and/or other activities that develop educational knowledge and expertise, referenced to UKPSF
<i>Internal contribution: Support to the academic environment in the Department or beyond</i>
<i>Internal citizenship</i> <ul style="list-style-type: none">• Supporting Department/Faculty/Centre/School events or special interest groups; organising seminars/lab meetings/journal clubs; group or departmental social organising; support to Athena Swan activities; support to external partnerships <i>General leadership and management roles</i> <ul style="list-style-type: none">• None expected but credit can be given if undertaken

¹ it is accepted that some RA roles and/or funding make it difficult to give time to Educational activities, but some degree of engagement is encouraged

External contribution: Support to the external academic community

External citizenship

- Involvement in journal or book reviews, if opportunities arise
- Sharing examples of good practice (e.g. contributing to discipline-specific interest group or professional bodies)

Knowledge translation and enterprise: not expected but options include

- Collection of evidence of research impact for impact case studies (e.g. policy records, correspondence with policy makers, media highlights)
- Engagement with policy/practice/industry/NGO communities and with the general public
