## Job Summary:

An exciting opportunity has arisen for an early career researcher with training in health economics and experience working in the water, sanitation, and hygiene (WASH) sector to join a rapidly growing and world-renowned research team - the [Environmental Health Group](#) at the London School of Hygiene and Tropical Medicine.

The post holder will support a number of ongoing public health research projects and will be expected to develop their own independent research agenda focused on the economics of WASH. The postholder will support large ongoing epidemiological evaluations of water, sanitation and hygiene (WASH) interventions in Mozambique and the Democratic Republic of Congo, as well as other smaller studies in other countries. Furthermore, the post holder will support the ongoing work of the Lancet Commission on WASH and Health through desk-based work which will include systematic reviews.

The successful applicant will have a track record of relevant research experience, including economic evaluation and systematic review, excellent communication skills, and an ability to work both independently and in close collaboration with in-country partners. The applicant should have an excellent academic track record that includes formal training in health economics, or a related field, and prior scientific publications related to the economics of WASH. It is also essential that the candidate has WASH sector research experience in low- and middle-income countries.

## General Information

The London School of Hygiene & Tropical Medicine

The London School of Hygiene & Tropical Medicine is a world-leading centre for research and postgraduate education in public and global health. Our mission is to improve health and health equity in the UK and worldwide; working in partnership to achieve excellence in public and global health research, education and translation of knowledge into policy and practice.

Founded in 1899, the School has expanded in recent years at its two main sites on Keppel Street and Tavistock Place. Our staff, students and alumni work in more than 150 countries in government, academia, international agencies and health services.

Research income has grown to more than £180 million per year from national and international funding sources including UK government and research councils, the European Union, the Wellcome Trust, Gates Foundation and other philanthropic sources.

Our diverse research talents, skills and experience, underpin our position as a leader in public and
global health. These range from the molecular to the global, the theoretical to the applied, the analytical to the political. Our staff are conducting research in more than 100 countries.

We have 3,300 staff based all around the world with core hubs in London and at the MRC Units in The Gambia and Uganda, which joined LSHTM in February 2018. Our outstanding, diverse and committed staff make an impact where it is most needed - deploying research in real time in response to crises, developing innovative programmes for major health threats, or training the next generations of public and global health leaders and researchers.

Working in partnership is central to achieving our mission. Our strategic collaborations in the UK and across high-, middle- and low-income countries deliver health and socioeconomic benefits across the world, especially in the most disadvantaged communities.

LSHTM is also a member of the M8 Alliance of Academic Health Centers, Universities and National Academies, the Association of Schools of Public Health in the European Region, and the Consortium of Universities for Global Health.

We deliver research-led educational programmes to future health leaders, managers and researchers across the world. We have more than 1,200 face-to-face Master's and Doctoral students, 3,000 studying by distance learning, and 1,000 each year on short courses and continuous professional development. Our free online courses are studied by more than 70,000 participants globally.

LSHTM performs strongly in various global university league tables. In the 2019 CWTS Leiden Ranking LSHTM is ranked the UK’s top university for the proportion of academic research with women listed as authors, first in Europe for publishing open access research, and first in Europe and eighth in the world for research impact in sciences (for the proportion of its total publications ranking in the top 10% of most cited research).

In the US News Best Global Universities Ranking 2019, we ranked ninth in the UK overall and 13th in the world in the fields of social sciences and public health. We ranked 27th for medicine in the 2019 QS World University Rankings.

In 2017, the inaugural Center for World University Rankings by Subject placed LSHTM first in the world for tropical medicine research, second for parasitology and seventh for infectious diseases, public, environment and occupational health, and social sciences and biomedical.

LSHTM was named University of the Year 2016 by Times Higher Education and awarded a Queen's Anniversary Prize for Higher and Further Education in 2017 in recognition of our response to the 2014 Ebola epidemic in West Africa. LSHTM does not appear in the Times Higher Education World University Rankings as universities are excluded if they do not teach undergraduates.

We seek to foster and sustain a creative and supportive working environment based upon an ethos of respect and rigorous scientific enquiry. We embrace and value the diversity of our staff and student population and seek to promote equality as an essential element in contribution to improving health worldwide.

LSHTM is one of around 20 specialist institutions that receive institution specific funding from the Office for Students (OfS). This funding recognises the additional costs that LSHTM incurs because of its unique range of teaching, specialist facilities, and the scale of its contributions to national and international agencies.
FACULTY INFORMATION

Faculty of Infectious and Tropical Diseases

The Faculty of Infectious and Tropical Diseases encompasses all of the laboratory-based research in the School as well as that on the clinical and epidemiological aspects of infectious and tropical diseases. It is headed by Alison Grant, who is Professor of International Health. The range of disciplines represented in the faculty is very broad and inter-disciplinary research is a feature of much of our activity. The spectrum of diseases studied is wide and there are major research groups with a focus on malaria, tuberculosis, HIV/AIDS and other sexually transmitted diseases, vaccine development and evaluation, and vector biology and disease control. The Faculty is organised into three large research departments comprising: Clinical Research, Disease Control, and Infection Biology. There is close interaction between scientists in different research teams. The Faculty has strong overseas links, which provide a basis for field studies and international collaborations in developed and developing countries. The teaching programme includes MSc courses, taught in-house and by distance learning, which are modular in structure, a variety of short-courses and an active doctoral programme (PhD and DrPH). For further information on the Faculty see: http://www.lshtm.ac.uk/itd/index.html.

Department of Disease Control (Head: Professor James Logan)

The Department of Disease Control is a multidisciplinary, cross-cutting department, operating in a global context and committed to excellence in research, innovation, learning and engagement. We have an outstanding reputation for internationally competitive research and teaching excellence, with demonstrable impact in the control of diseases, worldwide. Our diverse scientific staff comprises entomologists, epidemiologists, mathematical modellers, geographers, public health engineers, hygiene specialists, social scientists, engineers, statisticians and clinical scientists. We also have a strong team of project administrators, coordinators, managers, and communication specialists, who provide expert support to our research programmes in the UK and overseas. We are a highly collaborative Department, with extensive partnerships and collaborations with researchers from many countries and organisations around the world, as well as internally, with multiple School Departments. Our work cuts across several School Centres such as the Vaccine Centre, the Malaria Centre, Centre for Evaluation and the MARCH Centre.

Our staff play influential roles as consultants and key advisors to organisations including the WHO, CDC, Malaria Consortium, Public Health England, Department of Health, DFID, Bill and Melinda Gates Foundation, the Royal Society, Research Councils, Academy of Medical Sciences, the World Bank, Governments and private sector manufacturers and innovators, amongst many others. Our range of expertise provides us with an impressive set of tools for addressing the control of diseases that are insect-borne, water-borne or associated with poor hygiene – mostly in low- and middle-income countries. Much of our research is directed at current health policy issues and addressing gaps between policy and practice.

Teaching

The School offers 19 one year full-time taught courses leading to the Master of Science (MSc) degree of the University of London and the Diploma of the London School of Hygiene and Tropical Medicine (DLSHTM). The Faculty of Infectious and Tropical Diseases runs or contributes substantially to ten of these courses and the “Immunology of Infectious Diseases” course is run from within the Department of Immunology and Infection. In addition, the Faculty is responsible for the three-month Diploma in Tropical Medicine and Hygiene (DTM&H), the Diploma in Tropical Nursing and offers a range of specialist short courses lasting usually one or two weeks. Five MSc courses are also offered by Distance-based Learning, including one on Infectious Diseases.
Research Training

The School offers two doctoral training programmes. The MPhil/PhD degrees are designed for those who wish to go on to a full time research career. The DrPH is directed towards those who expect their careers to be more in the practice of public health.
The portfolio of duties outlined below will vary in accordance with the detailed expectations of the role (attached), which may be varied from time to time, and agreed at your annual Performance and Development Review (PDR).

**JOB DESCRIPTION**

**Main Activities and Responsibilities**

**KNOWLEDGE GENERATION**
1. To undertake high quality research & scholarship, including contributing to drafting major grant proposals and/or leading on drafting small grant proposals;
2. To contribute to peer-reviewed publications, including as lead author;
3. To make a contribution to research degree student supervision, as appropriate to qualifications and experience;
4. To manage small grants or elements of larger grants, ensuring compliance with good practice in relation to the conduct of research, the ethics policy and other relevant School policies.
5. Manage field data collection for all projects, remotely and in-person, and liaise effectively with other field-based members of the team, under the direction of the Principal Investigator (PI). This includes remote daily monitoring of incoming data collected by field teams, as well as holding regular debriefing sessions with field teams.
6. Undertake extended (up to 4 weeks at a time) visits to study sites to train research staff, oversee data collection and ensure compliance with study protocols and standard operating procedures
7. Contribute to regular communication with study partners and funding organizations and develop and manage an excellent, respectful and equitable working relationship with partner organizations
8. Liaise effectively with other London based members of study team as required under the direction of the PI
9. Liaise effectively with the Project Manager (PM) to ensure effective day-to-day administration of the grant, including liaison with sub-contractors around invoicing and reporting, and preparing project reports for the donors
10. Lead the analysis and interpretation of data under the supervision of the PI, including effective liaison with other members of research team
11. Lead the development of study protocols, manuals for field staff, research tools, ethics applications for study activities under the supervision of the PI.
12. Coordinate supply procurement and shipment of supplies and samples to and from study site as needed.
13. Contribute to the dissemination of research findings through presentations, participation in workshops and conferences, as required.
14. Undertake other duties assigned by the PI as per the needs of the project

**EDUCATION**
1. To contribute to the delivery of high quality, research-informed teaching and assessment in relation to your specific subject and within the broader area covered by your department and disciplinary field;
2. To contribute to the improvement of the quality of the School’s education, by participating in the development of new and updated learning and teaching materials or approaches.
3. Contribute to the Faculty teaching programme, up to 0.1FTE

INTERNAL CONTRIBUTION
1. To undertake activities that support the Department, Faculty or the School;
2. To participate in the School’s PDR process.
3. To participate in and support the activities of the Environmental Health Group, including meetings, planning and strategy activities, and other activities as agreed with line manager

EXTERNAL CONTRIBUTION
1. To demonstrate good external citizenship by contributing to learned society/conference events, journal and grant reviews etc;
2. To participate in in-country capacity building and training activities.
3. To represent relevant studies in international fora (scientific and policy) when required by PI

PROFESSIONAL DEVELOPMENT & TRAINING
1. To keep up to date with the latest research/thinking in your academic field and with changes to pedagogic practice within the School and more generally;
2. Where the length and nature of the position permits, to apply for and, if accepted, undertake a doctoral degree (if not already acquired);
3. To undertake and successfully complete the mandatory training required by the School appropriate to the role.

GENERAL
All academic staff are free within the law to question and test received wisdom, and put forward new ideas and controversial or unpopular opinions, to enable the School to engage in research and promote learning to the highest possible standards.

All staff at LSHTM are also expected to:
1. Act at all times in the School’s best interests;
2. Treat School staff, students and visitors with courtesy and respect at all times;
3. Comply fully with School policies, procedures and administrative processes relevant to the role, including when acting as Principal Investigator, accepting academic, managerial, financing and ethical responsibility for a project
4. Uphold and support the School’s values (as set out in the School Strategy document);
5. Act as ambassadors for the School when hosting visitors or attending external events

The above list of duties is not exclusive or exhaustive and the role holder will be required to undertake such tasks as may reasonably be expected within the scope and grading of the role.
Role descriptions should be regularly reviewed to ensure they are an accurate representation of the role.

[FEB 2020]
PERSON SPECIFICATION

This form lists the essential and desirable requirements needed by the post holder to be able to perform the job effectively.

Applicants will be shortlisted solely on the extent to which they meet these requirements.

ESSENTIAL CRITERIA:

1. An advanced postgraduate degree, ideally a doctoral degree, in economics on a topic relating to WASH and public health
2. Proven ability to work independently, as well as collaboratively as part of a research team, and proven ability to meet research deadlines.
3. Evidence of excellent interpersonal skills, including the ability to communicate effectively both orally and in writing
4. Evidence of good organizational skills, including effective time management.
5. Proven experience in the rigorous economic evaluation of WASH interventions in LMIC, including cost-benefit and cost-effectiveness analysis
6. Proven experience developing and implementing quantitative and qualitative data collection methods, including household questionnaires, in-depth interviews and focus groups discussions
7. Proven experience coordinating complex research in LMIC, including the effective training and management of data collection teams, for both qualitative and quantitative research
8. Proven experience designing and implementing systematic review protocols related to WASH interventions and economic evaluation
9. Proven experience of effective collaborative working with government, multilateral or non-governmental organisations (NGOs) in LMIC
10. Prior experience in data management and analysis, using Stata and NVivo or equivalent software
11. Proven experience of authoring articles in peer-reviewed scientific journals for public health, including as first author, and presenting study results at scientific conferences
12. Excellent written and spoken English and experience of presenting scientific results to lay audiences, including for government, international agencies and NGOs
13. Experience of developing successful grant applications for WASH research in LMIC from a range of donors, and successful management of these grants
15. Ability and willingness to travel up 16 weeks per year with frequent travel to medium and/or high-risk environments and in-line with FCO and LSHTM policies on travel during COVID-19 pandemic

DESIRABLE CRITERIA

1. Some experience of contributing to research grant applications.
2. Some experience of teaching and assessment.
3. Some experience of supervising and supporting junior researchers and/or research degree students, and non-academic staff.
4. Research experience in Mozambique or Democratic Republic of Congo
5. Professional proficiency in Portuguese and/or French
6. Experience working with the Bill and Melinda Gates Foundation and the Foreign and Commonwealth Development Office
SALARY AND CONDITIONS OF APPOINTMENT

The post is a fixed term post until 31 December 2021 and is available from 01 January 2021. Salary is on the Academic Grade 6 scale in the range £40,011 - £45,437 per annum (inclusive of London Weighting). The post will be subject to the LSHTM terms and conditions of service. Annual leave entitlement is 30 working days per year, pro rata for part time staff. In addition to this there are discretionary “Director’s Days”. Membership of the Pension Scheme is available. The post is based in London at LSHTM.

Applications should be made online via our website at http://jobs.lshtm.ac.uk. Applications should also include the names and email contacts of 2 referees who can be contacted immediately if shortlisted. Online applications will be accepted by the automated system until 10pm of the closing date. Any queries regarding the application process may be addressed to jobs@lshtm.ac.uk. Please quote reference ITD-DCD-2020-29

The supporting statement section should set out how your qualifications, experience and training meet each of the selection criteria. Please provide one or more paragraphs addressing each criterion. The supporting statement is an essential part of the selection process and thus a failure to provide this information will mean that the application will not be considered. An answer to any of the criteria such as “Please see attached CV” will not be considered acceptable. Please note that if you are shortlisted and are unable to attend on the interview date it may not be possible to offer you an alternative date.

ASYLUM AND IMMIGRATION STATEMENT

The School will comply with current UKVI legislation, which requires all employees to provide documentary evidence of their legal right to work in this country prior to commencing employment. Candidates will be required to email a copy of their passport (and visa if applicable) to HR prior to their interview and if appointed will be asked to bring the original documents in to be copied and verified before their start date.

Applications from candidates who require sponsorship to work in the UK will be considered alongside other applications. Applicants who do not currently have the right to work in the UK will have to satisfy UK Visas & Immigration regulations before they can be appointed.

Further information about Sponsorship and eligibility to work in the UK, can be found at: https://www.gov.uk/guidance/immigration-rules/immigration-rules-appendix-skilled-worker

Date amended: August 2020
**Academic Expectations: Research Fellow**

Examples of expected types of activities are listed; the selection of activities will vary from year to year and not all activities in each category would necessarily be done in any one year. The statement in each shaded heading summarises the general expectations for contributions in each category. Given the nature of employment as a Research Fellow, it is expected that most activity will focus on knowledge generation, but some activity in other areas is required and will support career progression.
