

# RESEARCH FELLOW

<b>Job Title:</b>	<b>Research Fellow in Vaccine Economics</b>
<b>Department:</b>	Infectious Disease Epidemiology
<b>Faculty:</b>	Epidemiology and Population Health
<b>Location:</b>	London
<b>FTE:</b>	1.0
<b>Grade:</b>	G6
<b>Accountable to:</b>	Head of Department through Principal Investigator
<b>Job Summary:</b>	<p>Invasive disease due to typhoidal and non-typhoidal Salmonellae (inTS) is a major source of morbidity and mortality worldwide, particularly in low- and middle-income countries where the infection-fatality risk can be as high as 20%. Several candidate vaccines are in development, but will need a robust investment case to justify the cost of bringing them to licensure.</p> <p>The Wellcome Trust has funded a consortium of partners including LSHTM to develop a full value of vaccines assessment for both bivalent vaccines against non-typhoidal Salmonellae, and trivalent vaccines against typhoidal and non-typhoidal Salmonellae. The postholder will be responsible for bringing forward an innovative programme of work to investigate the broader societal and economic benefits of these vaccines, such as future productivity, antimicrobial resistance reductions, improved equity and social protection. The work be done in close partnership with the International Vaccine Institute (IVI) and the World Health Organization.</p> <p>The postholder will be supervised by Prof. Mark Jit and will be part of the Modelling and Economic Evaluation of Vaccines (MEEV) group, a highly successful and supportive group with a long history of working with a range of countries around the world on generating evidence to support vaccination policy. The postholder will also have the opportunity to affiliate with relevant centres at LSHTM (including the Vaccine Centre, Centre for Mathematical Modelling of Infectious Diseases and the Global Health Economics Centre).</p> <p>The successful applicant will have a PhD (or Masters degree and good research experience) in health economics, mathematical modelling, statistics, epidemiology or another relevant discipline with a strong quantitative component. Further particulars are included in the attached job description.</p>

## General Information

### The London School of Hygiene & Tropical Medicine

The London School of Hygiene & Tropical Medicine (LSHTM) is renowned for its research, postgraduate studies and continuing education in public and global health.

Our mission is to improve health and health equity in the UK and worldwide; working in partnership to achieve excellence in public and global health research, education and translation of knowledge into policy and practice.

We embrace and value the diversity of our staff and student population and seek to promote equity, diversity and inclusion as essential elements in contribution to improving health worldwide. We believe that when people feel respected and included, they can be more creative, successful, and happier at work. While we have more work to do, we are committed to building an inclusive workplace, a community that everyone feels a part of, which is safe, respectful, supportive and enables all to reach their full potential.

## **History**

Founded in 1899 at the London Docks, LSHTM is now based in Bloomsbury, where it has two main sites at Keppel Street and Tavistock Place, and additional sites in The Gambia and Uganda. Today, our staff, students and alumni work in government, academia, international agencies and health services across the world.

## **Research**

Research income has grown to more than £180 million per year from national and international funding sources including UK government and research councils, the European Union, the Wellcome Trust, Gates Foundation and other philanthropic sources.

Our diverse research talents, skills and experience underpin our position as a leader in public and global health. These range from the molecular to the global, the theoretical to the applied, the analytical to the political. Our staff are conducting research in more than 100 countries.

## **Staff community**

We have 3,300 staff based all around the world with core hubs in London and at the MRC Units in The Gambia and Uganda, which joined LSHTM in February 2018. Our outstanding, diverse and committed staff make an impact where it is most needed - deploying research in real time in response to crises, developing innovative programmes for major health threats, or training the next generations of public and global health leaders and researchers.

## **Partnerships**

Working in partnership is central to achieving our mission. Our strategic collaborations in the UK and across high-, middle- and low-income countries deliver health and socioeconomic benefits across the world, especially in the most disadvantaged communities.

LSHTM is also a member of the M8 Alliance of Academic Health Centers, Universities and National Academies, the Association of Schools of Public Health in the European Region, and the Consortium of Universities for Global Health.

## **Education**

We deliver research-led educational programmes to future health leaders, managers and researchers across the world. We have more than 1,200 face-to-face Master's and Doctoral students, 3,000 studying by distance learning, and 1,000 each year on short courses and continuous professional development. Our free online courses are studied by more than 270,000 participants globally.

## **Excellence in research and education**

We perform strongly in various global university league tables. In the ShanghaiRanking's Global Ranking of Academic Subjects 2020 we placed 3rd in public health (1st in the UK). In the 2020 CWTS Leiden Ranking LSHTM is ranked the UK's top university for the proportion of academic research with women listed as authors, and third in Europe for publishing open access research.

In the US News Best Global Universities Ranking 2021, we ranked 3rd in the world for public, environmental & occupational health, 4th in the world for infectious diseases, 11th in the world for social sciences & public health, and 12th best University in the UK overall. We ranked 27th for medicine in the 2019 QS World University Rankings.

In 2017, the inaugural Center for World University Rankings by Subject placed LSHTM first in the world for tropical medicine research, second for parasitology and seventh for infectious diseases, public, environment and occupational health, and social sciences and biomedical.

LSHTM was named University of the Year 2016 by Times Higher Education and awarded a Queen's Anniversary Prize for Higher and Further Education in 2017 in recognition of our response to the 2014 Ebola epidemic in West Africa. LSHTM does not appear in the Times Higher Education World University Rankings as universities are excluded if they do not teach undergraduates.

We seek to foster and sustain a creative and supportive working environment based upon an ethos of respect and rigorous scientific enquiry. We embrace and value the diversity of our staff and student population and seek to promote equality as an essential element in contribution to improving health worldwide.

LSHTM is one of around 20 specialist institutions that receive institution specific funding from the Office for Students (OfS). This funding recognises the additional costs that LSHTM incurs because of its unique range of teaching, specialist facilities, and the scale of its contributions to national and international agencies.

## Faculty Information

**The Faculty of Epidemiology & Population Health (EPH)** houses a large group of epidemiologists, demographers, statisticians and nutritionists working on issues of major public health importance in the UK and globally. EPH has approximately 400 staff members organised into four research departments.

- Department of Infectious Disease Epidemiology
- Department of Medical Statistics
- Department of Non-communicable Disease Epidemiology
- Department of Population Health

The Faculty has a teaching programme consisting of ten MSc courses: Epidemiology, Demography and Health, Medical Statistics, Public Health for Development (run jointly with the Faculties of Infectious & Tropical Diseases and Public Health & Policy), Nutrition for Global Health, Reproductive & Sexual Health Research, Veterinary Epidemiology (run jointly with the Royal Veterinary College), Global Mental Health (run jointly with Kings College London - Institute of Psychiatry) and the Distance Learning courses in Epidemiology, Clinical Trials and Demography and Health. The Faculty also has approximately 120 research students studying for an MPhil, PhD or DrPH degree.

The Dean of Faculty is Professor Elizabeth Allen.

### GLOBAL HEALTH ECONOMICS CENTRE

The **Global Health Economics Centre (GHECO)** is one of the largest academic groups of health economists within the UK and globally. GHECO conducts health economic research, education and policy translation in order to improve health and wellbeing in the UK and worldwide; working in equitable partnerships globally to achieve excellence in the field of health economics. GHECO recognizes that health economic research is intrinsically a multi-disciplinary endeavour, bringing together economists, epidemiologists, policy analysts, statisticians, modellers, psychologists, philosophers and those interested in different disease areas and health systems.

### CENTRE FOR MATHEMATICAL MODELLING OF INFECTIOUS DISEASES

The **Centre for the Mathematical Modelling of Infectious Diseases (CMMID)** is a multidisciplinary grouping of epidemiologists, mathematicians, economists, statisticians and clinicians from across all three faculties of the LSHTM. Research focuses on understanding and predicting the epidemiology of infectious diseases so that more effective control programmes can be devised. Researchers are developing and applying mathematical models to a range of infections including HIV and other sexually transmitted infections, HPV, tuberculosis, hepatitis C, influenza, rotavirus, measles, varicella, pneumococcal disease, Hib, malaria and sleeping sickness. More recently, CMMID has been one of the leading groups involved in responding to modelling needs in the UK and globally around the COVID-19 pandemic.. More fundamental research includes developing methods to measure underlying contact patterns, sampling hard-to-reach populations (such as drug users), efficiently fitting complex mathematical models to data, and the integration of epidemiological models with economic analyses. CMMID is actively engaged in developing links with other modelling groups; members of the CMMID include mathematical modellers working at the UK Health Security Agency (formerly Public Health England) and the Royal Veterinary College.

The portfolio of duties outlined below will vary in accordance with the detailed expectations of the role (attached), which may be varied from time to time, and agreed at your annual Performance and Development Review (PDR).

## Job Description

### Main Activities and Responsibilities

### Knowledge Generation

1. To undertake high quality research & scholarship, including contributing to drafting major grant proposals and/or leading on drafting small grant proposals, and evaluating teaching practice;
2. To contribute to peer-reviewed publications and other outputs, including as lead author;
3. To make a contribution to doctoral student supervision, as appropriate to qualifications and experience;
4. To manage small grants or elements of larger grants, ensuring compliance with good practice in relation to the conduct of research, the ethics policy and other relevant School policies.
5. To investigate the broader social and economic benefits of vaccines against invasive disease due to typhoidal and non-typhoidal Salmonellae. Such benefits may include future productivity, antimicrobial resistance reductions, improved equity and social protection. This will involve developing and/or adapting epidemiological and economic models of typhoidal and non-typhoidal Salmonellae and their long-term effects.
6. To understand, discuss and advance methodology around full value of vaccines assessment (<http://dx.doi.org/10.2139/ssrn.3841999>) and broader economic benefits of vaccines (<https://doi.org/10.1186/s12916-015-0446-9>).
7. To lead and contribute to reports for key stakeholders as well as manuscripts for peer-reviewed journals.
8. To liaise with key partners including the International Vaccines Institute (IVI) and the World Health Organization.
9. To identify, apply to and participate in consultations, Consortia meetings, scientific conferences and other dissemination fora.
10. To contribute to future grant applications in relevant areas.

### Education

1. To contribute to the delivery of high quality, inclusive, research-informed teaching and assessment in relation to your specific subject and within the broader area covered by your department and disciplinary field;
2. To contribute to the improvement of the quality of the School's education, by participating in the development of new and updated learning and teaching materials or approaches.

# RESEARCH FELLOW

## Internal Contribution

1. To undertake activities that support the Department, Faculty, MRC Unit or the School;
2. To reflect LSHTM's EDI goals in your work and behaviour;
3. To participate in the School's PDR process.
4. To contribute to the activities of LSHTM's Centre for Health Economics in London and Centre for Mathematical Modelling of Infectious Diseases.

## External Contribution

1. To demonstrate good external citizenship by contributing to learned society/conference events, journal and grant reviews etc;
2. To contribute to the activities of the wider consortium.

## Professional Development & Training

1. To keep up to date with the latest research/thinking in your academic field and with changes to pedagogic practice within the School and more generally;
2. Where the length and nature of the position permits, to apply for and, if accepted, undertake a doctoral degree (if not already acquired);
3. To undertake and successfully complete the mandatory training required by the School appropriate to the role.

## General

All academic staff are free within the law to question and test received wisdom, and put forward new ideas and controversial or unpopular opinions, to enable the School to engage in research and promote learning to the highest possible standards.

All staff at LSHTM are also expected to:

1. Act at all times in the School's best interests;
2. Treat School staff, students and visitors with courtesy and respect at all times;
3. Comply fully with School policies, procedures and administrative processes relevant to the role, including when acting as Principal Investigator, accepting academic, managerial, financing and ethical responsibility for a project
4. Uphold and support the School's values (as set out in the School Strategy);
5. Act as ambassadors for the School when hosting visitors or attending external events.

## **RESEARCH FELLOW**

LONDON  
SCHOOL of  
HYGIENE  
& TROPICAL  
MEDICINE

*The above list of duties is not exclusive or exhaustive and the role holder will be required to undertake such tasks as may reasonably be expected within the scope and grading of the role.*

*Role descriptions should be regularly reviewed to ensure they are an accurate representation of the role.*

*[Jul 2021]*

## Person Specification

This form lists the essential and desirable requirements needed by the post holder to be able to perform the job effectively.

Applicants will be shortlisted solely on the extent to which they meet these requirements.

### Essential criteria:

1. A postgraduate degree in a quantitative subject, ideally a doctoral degree in health economics, mathematical modelling, statistics or epidemiology.
2. Relevant experience in health economic, statistical and/or mathematical modelling of health conditions, ideally infectious diseases.
3. Contributions to written output, preferably peer-reviewed, as expected by the subject area/discipline in terms of types and volume of outputs.
4. Proven ability to work independently, as well as collaboratively as part of a research team, and proven ability to meet research deadlines.
5. Evidence of excellent interpersonal skills, including the ability to communicate effectively both orally and in writing
6. Evidence of good organizational skills, including effective time management.
7. Ability to program in a suitable language, such as R (preferred), Python, C/C++ or Visual Basic.

### Desirable Criteria

1. Some experience of contributing to research grant applications.
2. Some experience of teaching and assessment.
3. Some experience of supervising and supporting junior researchers and/or research degree students, and non-academic staff.
4. Experience in modelling infectious disease in low- and middle-income countries.

## Salary and Conditions Of Appointment

The post is funded from 1 June 2022 until 2 May 2024. The salary will be on the Academic scale, Grade 6 in the range £40,611 - £46,119 per annum (inclusive of London Weighting). The post will be subject to the LSHTM terms and conditions of service. Annual leave entitlement is 30 working days per year, pro rata for part time staff. In addition to this there are discretionary "Wellbeing Days". Membership of the Pension Scheme is available.

Applications should be made on-line via our website at <http://jobs.lshtm.ac.uk>. Applications should also include the names and email contacts of 2 referees who can be contacted immediately if appointed. Online applications will be accepted by the automated system until 10pm of the closing date. Any queries regarding the application process may be addressed to [jobs@lshtm.ac.uk](mailto:jobs@lshtm.ac.uk).

The supporting statement section should set out how your qualifications, experience and training meet each of the selection criteria. Please provide one or more paragraphs addressing each criterion. The supporting statement is an essential part of the selection process and thus a failure to provide this information will mean that the application will not be considered. An answer to any of the criteria such as "Please see attached CV" will not be considered acceptable.

Please note that if you are shortlisted and are unable to attend on the interview date it may not be possible to offer you an alternative date.

## Asylum And Immigration Statement

The School will comply with current UKVI legislation, which requires all employees to provide documentary evidence of their legal right to work in this country prior to commencing employment. Candidates will be required to email a copy of their passport (and visa if applicable) to HR prior to their interview and if appointed will be asked to bring the original documents in to be copied and verified before their start date.

Applications from candidates who require sponsorship to work in the UK will be considered alongside other applications. Applicants who do not currently have the right to work in the UK will have to satisfy UK Visas & Immigration regulations before they can be appointed.

Further information about Sponsorship and eligibility to work in the UK, can be found at: <https://www.gov.uk/guidance/immigration-rules/immigration-rules-appendix-skilled-worker>

Date amended: Jul 2021

## Academic Expectations: Research Fellow

Examples of expected types of activities are listed; the selection of activities will vary from year to year and not all activities in each category would necessarily be done in any one year. The statement in each shaded heading summarises the general expectations for contributions in each category. Research Fellows employed on research projects will be expected to focus on Knowledge Generation, in accordance with their job description, but some activity in other areas is required and will support career progression. Research Fellows predominantly employed to support Education will be expected to focus on Education, again as reflected in their job description.

### ***Knowledge generation: Independent contributions and a clear trajectory towards excellence in knowledge generation***

#### *Research and scholarship*

- Undertaking research
- Working with PIs to draft grant proposals and/or leading writing of small grants, work packages or sections of larger proposals or personal fellowship applications
- Contributing to peer-reviewed and other research outputs, including as first author, as expected by the subject area/discipline in terms of types of output
- Poster/oral presentations at relevant conferences, translation of research findings into educational materials
- Social media contributions such as twitter, blogs, web-based media or webinars

#### *Reflective practice and critical enquiry (RPaCE)*

- Contributing to RPaCE activities
- Designing evaluation studies
- Disseminating learning and experiences through presentations, blogs etc
- Contributing to enhancing teaching practice of others: e.g. mentoring, teaching observation and feedback

#### *Doctoral degree supervision*

- For RFs with Doctorate, some contribution to doctoral degree supervision is encouraged (e.g. specialist skills training; ad hoc advice; advisory committees). RFs without a Doctorate may also advise in areas of specialist knowledge

#### *Research management, leadership and support*

- Effective management of own time and activities
- Management of small research grants or elements of larger grants, including management of data collection and relationships with research collaborators, supporting/mentoring colleagues, support to grants management

#### *Professional development*

- Courses and other professional development activities, referenced to RDF
- Where the length, nature and funding source of the position permit, to apply for and, if accepted, undertake a doctoral degree (if not already acquired)

<b>Education: Basic competence in teaching and assessment</b>
<p><i>Teaching and assessment</i></p> <ul style="list-style-type: none"> <li>• Research-informed teaching and assessment contributions (e.g. contributions to modules, MSc project supervision)</li> </ul> <p><i>Educational development and innovation</i></p> <ul style="list-style-type: none"> <li>• Contributing to the development of new educational materials, learning opportunities or assessments approaches</li> </ul> <p><i>Education leadership and management</i></p> <ul style="list-style-type: none"> <li>• None expected</li> </ul> <p><i>Professional development</i></p> <ul style="list-style-type: none"> <li>• Participation in professional development activities referenced to UKPSF (e.g. HEA, PGCILT, preparation for doctoral degree supervision, shadowing more experienced colleagues); acquiring Associate Fellow HEA</li> </ul>
